AIAA ILLINOIS GENERAL MEETING

AIAA UIC AND AIAA IIT PRESENT: "THE STUDENT TO PROFESSIONAL TRANSITION"

**GUEST SPEAKER:
SAVAS MAVRIDIS**

Savas Mavridis (Georgia Tech Aerospace Engineering 2019) is a young professional in the aerospace industry with a broad background stretching from launch vehicle integration and testing to systems engineering of EO/IR remote sensing platforms. Savas is a NASA Community College Aerospace Scholar (2017), Vice Chair of AIAA Illinois, has worked for Orbital ATK, GTRI, Lockheed Martin, and Northrop Grumman, and is currently pursuing a masters in Aerospace Engineering at Georgia Tech's ASDL.

**THURSDAY, NOVEMBER 10
AT 6:30 PM**

**ENGINEERING RESEARCH FACILITY (ERF)
842 W. TAYLOR ST.
ROOM 1043
CHICAGO, ILLINOIS**

Transitioning from student to professional can be daunting- career planning, mentorships, salary expectations, location, location, location. Join AIAA Illinois as we host Savas Mavridis for a discussion on what to expect as one transitions from student to young professional. We will go over:

- What is the difference between Academia and Industry?
- What does the industry look like in 2022?
- Where do I find a job that aligns with my interests?
- What do all these job requisition titles mean?
- What will I really be doing for the first five years of my career?
- How do I get career advice after I enter the industry?

Please bring your most pressing questions to get one engineer's insight on working in the industry as a young professional.
