

# Shadow Craft – A World of Secret Flight

## L. SCOTT MILLER

**Dinner Meeting**  
Thursday  
25 February 2010  
All Welcome

A great deal of aircraft development in America has taken place in secrecy. The U-2, SR-71 Blackbird, B-2 Spirit Bomber, and F-117 Stealth Fighter are some now high-profile examples of once hidden efforts.

**Time**  
6:00 PM Social  
6:30 PM Dinner  
7:30 PM Main Presentation

The existence of these rumors, at minimum, provokes the public interest and generates lots of questions. For example, what goes on in "Area 51" and what specifically has happened or might now be happening in the secret or "black" world? What new technologies and missions are associated with the rumored planes, where are they built and based, and how many are operational? Is it actually possible to build a visually stealth airplane? Are some of the aircraft unmanned? Does the hypersonic vehicle popularly called "Aurora" really exist? There are obviously many questions, with elusive and interesting answers.

**Location**  
Endeavor Room  
Wright State Univ Student Union  
3640 Colonel Glenn Highway  
Dayton, OH

The presentation will summarize many of the rumors and review publicly available evidence that suggests the existence of secret aircraft projects. The viability of the rumors and evidence will be discussed and some additional ideas will be offered.
