**“GE Power business &
EPISCenter Overview”**

Guest Speaker:

Mr. Sean Foss

Senior Sales Staff Director

GE Aerospace

Abstract: There is increasing need for more electric power on current and future aerospace platforms. GE Electric Power, a GE Aerospace business, continues to make investments and develop new technologies and products to support these increasing demands. GE Electric Power is headquartered in Dayton, OH at the GE EPISCenter, a state of the art electrical power integration facility. This presentation will overview the business, products, EPISCenter capabilities, and general discussion on industry trends for more electric power.

Biography: Sean Foss is the Senior Sales Staff Director at GE Aerospace Electrical Power, responsible for sales and business development activities across multiple power businesses, and is physically located at the EPISCenter, the Electric Power integration facility in Dayton, OH. In this role, Sean leads the sales and business development team responsible for developing and executing new business growth strategies across military and civil aerospace markets, ensuring new business is secured across the electrical power product portfolio and integrated systems solutions.

Sean joined GE Aviation in 2007, transitioning from the United States Navy where he spent 10 years as a United States Naval Aviator, serving as a SH-60 Seahawk Aircraft and Mission Commander. Sean served on two operational deployments in support of Operation Southern Watch and Operation Iraqi Freedom.
