

American Institute of Aeronautics and Astronautics

**St. Louis Section**

**Thursday, March 19, 2020**

**Challenger Learning Center – St. Louis  
205 Brotherton Lane  
Ferguson, MO 63135**

## ***Educator Associate Recognition Night at the Challenger Learning Center***

Experience a space mission simulation at the Challenger Learning Center with the St. Louis American Institute of Aeronautics and Astronautics (AIAA) and local educators. After a brief orientation, participants will take on the role of astronaut, scientist, or engineer on board a spacecraft or in mission control. Together, the crew must use teamwork and critical thinking to accomplish their mission to return to the moon. A light dinner will be served prior to the event.

The Challenger Learning Center-St. Louis is dedicated to inspiring future generations of innovators through space mission simulations and other STEM education programs. It is part of a worldwide network of over 40 Centers founded by the families of the astronauts tragically lost during the 1986 Challenger space shuttle mission.
