The Mariners' Museum *USS Monitor* Replica

Hosted by the local sections of
American Institute of Aeronautics and Astronautics (AIAA)
and
American Society of Mechanical Engineers (ASME)
and
The Mariners' Museum and Park

Join the fun at the 2024 ASME/AIAA Egg Drop Design Competition! Designed to promote engineering and science for students, this competition is open to **all ages**. This year, the event is located at the Mariners' Museum and Park at the Monitor Replica.

Participants are asked to build a device to protect an egg from a second story (approximately 20 feet high) drop to keep it from going splat! The lightest device that comes closest to the target while protecting the egg wins! We recommend that you build your device in advance, as limited supplies will be available on site. Eggs will be supplied at the contest.

Participation is FREE!*
PRIZES for winners in each age group!
