with Guest Speaker:*

Mr. Larrell Walters from

IDCAST

Friday, 23 Sept 2011

The Institute for the Development and Commercialization of Advanced Sensor Technology (IDCAST) was founded in 2006 when the University of Dayton received funding from the State of Ohio's Third Frontier Project to establish IDCAST as a Wright Center of Innovation. IDCAST is a collaborative commercialization organization consisting of eight Ohio universities, twelve endowed chairs in layered sensing, the Air Force Research Laboratory, and over 30 Ohio companies focused on bringing Remote Sensing and Chemical/Biological sensing application to market. With \$6.4 million in matching funds for the commercialization activities and over 75,000 square feet of collaborative laboratory space, IDCAST serves the sensor needs of the safety, security, environmental, and biomedical markets. IDCAST also supports the academic, industrial, and federal lab communities by providing access to expertise, facilities, and equipment.

Larrell Walters is the Director of the Institute for the Development and Commercialization of Advanced Sensor Technology (IDCAST), a \$28 million Wright Center of Innovation led by the University of Dayton Research Institute and the head of the University of Dayton Research Institute's Sensor Technology Office. Prior to these positions Walters was the Director of Technology Partnership for the University of Dayton, Vice President of Product Development for EMTEC, President of Gem City Engineering, President of Lytton Electronics, and senior management positions at Goodrich, and Goodyear Aerospace.

Time

11:45 AM

Location

China Garden Buffet
112 Woodman Dr.
