

AIAA and ASME **ZOOM** Meeting  
**Thursday, March 3, 2022 at 0345 PM to 0500 PM PST**  
**Michael Collins, a Life Well Lived**  
**Dr Jennifer Ross-Nazzal**

and other participants shed light on the aviation, spaceflight, and historic contributions he made over his life.

Dr. Ross-Nazzal will give a presentation on Michael Collins, who is best known as an astronaut. His life, not only his years in the astronaut corps and spaceflight missions, will be explored in this presentation. Audio clips from his interview with the NASA Johnson Space Center Oral History Project

*Dr. Jennifer Ross-Nazzal has served as the JSC Historian since 2004. She provides reference assistance to NASA and the public and has shared her expertise with journalists, writers, broadcasting agencies, documentarians, and many others. She was awarded her Ph.D. from Washington State University, her master's in History from New Mexico State University, and B.A. in History and Political Science from the University of Arizona. She also holds a master's in Information Science from the University of North Texas and a certificate in Historic Preservation.*

*Jennifer holds the unique distinction of being a scholar of NASA history and women's history. She has been featured as a subject matter expert in several documentaries; is an accomplished oral historian; and authored many publications. In 2015, the Texas State Historical Association awarded the Liz Carpenter Award for Research to Texas Women: Their Histories, Their Lives, a book containing her chapter on Mae Jemison, the first female astronaut of color. In 2012, Jennifer was awarded the Charles Thomson Prize from the Society for History in the Federal Government for her chapter focusing on the Shuttle accidents in NASA's Wings In Orbit: Scientific and Engineering Legacies of the Space Shuttle. Her essay, "You've Come a Long Way, Maybe: The First Six Women Astronauts and the Media," was included in Spacefarers: Images of Astronauts and Cosmonauts in the Heroic Era of Spaceflight (2013) and noted as "fascinating and an in-depth study on how the first group of NASA women dealt with the still occasionally sexist media." For this work, she received her second Thomson Prize in three years.*

*In 2011 she published her first book, Winning the West for Women, a biography of suffragist, Emma Smith DeVoe. That same year, she was recognized by NASA Headquarters for her outstanding work as a historian for the Agency. Her latest book, Making Space for Women, focuses on the history of JSC through the experiences of its female employees and was recently published by the Texas A&M Press.*

**AIAA – ASME ZOOM Meeting**

**Thursday, March 3, 2022 at 0345 PM – 0500 PM PST**
